

Fall/Winter Collection 2020/2021 Highlights

As a natural and instinctive teaching of the Nature, winter recalls in our collective imagination the vision of wool and the sensation of the warmth that wool is able to provide us.

Our 2020/2021 Fall/Winter collection is deeply focused on wools which are presented pure or in blend , using combed yarns or carded yarns. And it's among them that we propose fabrics with a heavy weight and high warmth, addressed mainly to the outerwear but suitable also to fleece sweatshirt clothing.

Heavy weights are also proposed in fabrics made in cotton pure or in blend , well suitable for a fine fleece clothing product of high quality and value.

Inside the collection we present wool and cotton fleeces in various pattern .

Considerably appealing are fleeces with outerwear weights, showing shiny and brilliant technical features which for female fashion turn to be iridescent .

Moreover ,as coat/jacket lining, we propose knitted wool and cotton fabrics presenting gently drawn blurred and wavy effects.

Tartan fabrics and Damier fabrics, with or without a felted aspect, are proposed using wool in blend with cotton (with no shortage of gassed and twisted cotton) and various fibers.

Among the collection you will be able to find a great choice of **padded fabrics** , both with continuous pattern or, (brand new), patterns on continuous panel with hem and separation ("teli con bordo"). In the "**teli con bordo**" section (continuous panel with hem and separation) stands the real newness : innovative padding fabrics which enhance and enrich the proposal creating new effects and features.

Our textile collection includes a great variety of fabrics able to meet any specific demand and application, ranging from outerwear to t-shirt industry.

The patented series "**aercor**" consist of spaced fabrics . These particular effects reached trough the weaving process, give fabrics uncommon features in terms of volume, thermal insulation and at the same time, extreme transpiration improving their thermo-physiological and sensory properties. Inside the series and as absolute innovation , we present small-scale jacquard in various compositions.

Instead of using fabrics glued and coupled with a lot of neo/moltopren or similar materials, the series "aercor" can solve all the problems related to transpiration and sweating, assuring a lot of comfort and volume too .

Sustainability is a way of life; recycle to preserve our precious environment and protect our world from extreme exploitation must be the goal.

The concept of "**sustainability**" is well carried out by using "ecotec" cotton and cotton/polyester yarn.

"**Ecotec**" is a recycled yarn which is obtained by the fraying of fabric's swatches.

This certified Grs yarn is suitable for fleece, single jersey, piquet, plus tubular jaquard. Reflective effects are proposed by lamé and reflective foils coupled with fabrics using super shiny and iridescent yarns

... and much more you will find in discovering our main themes:

EXCLUSIVE: Elegance and Value

In the pursuit of sobriety and elegance
Value yarns and style research.

FREEDOM: the beauty of freedom..

Added value Sportswear

PERFORMANCE: The "ready to dye"

The "ready to dye " division is supported by more than 50 fabrics sell in "stock service", shown in every collection and every season enriched by new proposals.
Most of our cotton fabrics belonging to the other collections' themes may be used for this purpose too

THIN: The thinnest...

The products made out of very thin yarns by very thin knitting needles, offer an excellent cover up and consistency with exiguous weights. Belonging to this series are fabrics stretched or not, made out of natural fibers so far as synthetic and artificial fibers. The versatile "Thin" series includes cottons, viscose, micromodal, polyamide and polyester, which can easily find their applications within underwear, shapewear, performance/technical sportswear and fashion garments.

FANCY: Design and colour...

Colour and Pattern –Fleece Jaquard

Iridescent Fleece

Eco-recycle: Sustainability

Heavy gauzed fleece

not gauzed fleece

Padded jacquard pattern on continuous panel with hem and separation
