

Spring/Summer Collection 2025

Highlights

Nowadays all the world of communication is focused on the theme of sustainability in all its forms and facets.

Reaching this goal , 3C Company offers:

- raw cotton fabrics, scoured and sanforized, with the presence of shells and straws, to reach a nature look
- greige, bleached, piece-dyed fabrics, made entirely with organically grown cotton yarn, GOTS certified.

We have been certified GOTS

- greige, bleached, piece-dyed fabrics, made with 50% recycled 50% bio organic cotton yarn, GRS certified.
- fabrics made with colored cotton yarn, regenerated by fraying of colored scraps, mixed with virgin cotton for its capacity to be spun into yarn

Made with these cotton yarns, the collection includes plain fabrics such as single jersey, piquet, fleeces and also patterned fabrics such as jacquard, accompanied by relative documentation. The naturalness persists with the historical presence of high quality cottons and linen, pure or in blend with cotton.

Fantasy and pattern are proposed in jacquard fabrics, embossed and plain, sometimes enriched by Lamè.

We renew our patented series "aercor" with the proposal of a tubic "aercor" plain or striped , with a lame side

The openwork, the transparency and the nets are developed in various articles designed with holes, of small and medium size, obtained using only knitting techniques.

"Lace" designs are made of 100% cotton, cotton / ea, cotton / pa and 100% pa.

"Made in Italy"

Knitting, Dyeing &, Finishing - Fabrics entirely made in Italy

PERFORMANCE: The "ready to dye"

6766 DOUBLE

6606 piquet malfilè

The "ready to dye" division is supported by more than 50 fabrics sell in "stock service", which are present in every collections but every season enriched by new proposals.

Most of our cotton fabrics belonging to the other collection themes may be used for this purpose too.

THIN: the thinnest....

The products made out of very thin yarns by very thin knitting needles, offer an excellent cover up and consistency with exiguous weights. Belonging to this series are fabrics stretched or not, made out of natural fibers so far as synthetic and artificial fibers. The versatile "Thin" series includes cottons, viscose, micromodal, polyammide and polyester, which can easily find their applications within underwear, shapewear, performance/technical sportswear and fashion garments.
